student activity 2

Name _____ Date _____

Create Your Own Pantomime!

Pantomime is when performers make elaborate gestures without words to express themselves. An example of pantomime is an actor pretending to pull a heavy object by holding an imaginary rope and adding resistance to their body movements.

Follow the steps below to create your own!

1. Think of a daily activity you do every day (*i.e., brushing your teeth, eating*).
2. Using the thumbnail boxes below, sketch the activity paying close attention to what your body does during those activities.

3. Get ready to perform your pantomime so your classmates can try to guess what activity you're presenting!
